2018 Camelot User Conference Sessions

Group Sessions

The Kingdom of Camelot – *Tyler Overcash*
Overview of the business with a short history of the company, our mission and how we are serving customers.

Excalibur, The Software of Legend – *Tola Coates*
supply chain solutions which improve profitability and performance through improved management of inventory, warehousing and shipping..

Keynote Speaker – Sandy Vosk, Advantage Technology Solutions
The strong US economy, exponential growth in eCommerce, the Amazon effect, and disrupting technological advancements are changing the 3PL warehousing industry. Stay on top of the trends and grow your business.

Excalibur Interfaces for Seamlessly Integrating External Data Sources – *Ryley Beaumont*
Learn about different methods for transmitting information in and out of Excalibur. Communicate data between multiple trading partners using Camelot's EDI solutions. Retrieve data from with API Web Services, as well as live order details from your clients via our WebLink Customer Portal.

eCommerce and High Volume Fulfillment Made Easy – *Javier Rodriguez*
This session focuses on Camelot's eOrder fulfillment module, which is a solution that applies the right mix of processes and workflow adjustment to handle high volumes of direct-to-consumer orders with greater speed and accuracy.

Increasing Productivity with Mobile Scanning – *Robert Anderson*
Integrate your operation activities directly into Excalibur by Implementation WIMS or MobileLink. Capture operator activity and productivity, increase picking accuracy and accountability, cut down on your paper and labor costs by implementing guided picking, or take advantage of advanced features like the integration with Workflow, Directed Putaway, or Labor Analysis.

System Management: Updates, Backups, Database Maintenance, and more! – *Adam Cohen*
Things move at a fast pace in the technology world, so it is important to stay on top of your database and systems to ensure they are running effectively. Delve into our processes for updates, upgrades, and server migrations, and learn other tips and tricks to maintain your Excalibur database and server environment.

Camelot Support and Software Enhancements – *Adam Cohen*
Learn about Camelot's online tools and service agreements and how system managers can expedite and reduce support. One critical success factor is applying updates to take advantage of software enhancements, and since you are on the front lines of the 3PL industry, we are always seeking your feedback to help us improve the value of our software and services.

Breakout Sessions

Management / Sales

Business Continuity / Disaster Recovery
Geoff Greenhill
Are you ready when disaster strikes? The threats are real and growing. In addition to storms, theft and accidents, cyber threats are also on the rise.

Business Intelligence – *Geoff Greenhill*
Discussion of Revenue and Profitability analysis by Client, warehouse, etc. Discussion and Demonstration of Key Performance Indicators, Dashboards, Client Reports Cards

Project Management –*Adam Cohen*
To keep projects moving, it is important for a dedicated project manager to oversee project milestones, timelines, and budgets, and ensure that the stakeholders are kept in sync. Learn about Camelot's project management through success stories and an overview of our services.

Operations & IT Breakout Sessions

Advanced Order Processing –*Raven Anderson*
As the demand for outsourced order fulfillment increases, your Camelot WMS is up to the task. This session focuses on inventory visibility, Reorder Points, Backorders/Shortages, Returns and more.

Tips and Tricks – *Javier Rodriguez*
This session is all about how to streamline processing and present information in a way that is most relevant to you and your clients. Excalibur offers powerful features that can streamline your overall workflow. We will review some of these features and highlighting their usefulness in day-to-day processing.

Software Development –*Tyler Overcash*
An overview of programming in Excalibur for the technical and non-technical alike. This session will explore the building blocks of the software, including the services that Camelot can provide to enhance and extend functionality, as well as Do-It-Yourself options for the more hands-on System Managers.
